EDUCATION

BFA Lighting Technology

2023-2027

Design & Production | UNC School of the Arts

- Programmed complex shows utilizing timecode in ETC EOS and grandMA3
- Planned and led teams installing, maintaining, and operating lighting equipment and electrical systems for several live performances.
- Served as a lighting designer, contributing to the creative and technical design process for productions drafted in Vectorworks Spotlight 3d.

PROFESSIONAL EXPERIENCE

Murphy Lighting Systems

SUMMER 2026

Lighting Technician Intern

- Contributed to large-scale themed entertainment projects in various stages of the pipeline from early mockup programming to on-site installation and commissioning.
- Designed and programmed lighting architectural interfaces for a school and convention center to client's spec.
- Tested, assembled, and validated lighting control systems and fixtures for theme park attractions and live shows.

Illuminated Integration

SUMMER 2025

Systems Integrator Intern

- Created custom tools utilizing Javascript, and Q-Sys LUA for client jobs and internal productivity.
- Performed quality control and testing of professional lighting equipment to ensure performance and reliability.
- Commissioned and configured ETC Paradigm, Mosaic, Pathway, and Q-Sys control systems and equipment.

Bandit Lites

SUMMER 2024

Summer Tech Apprentice

- Fabricated, tested, and assembled state-of-the-art touring concert lighting and playback rigs.

PERSONAL PROJECTS

Portfolio Website

Next.JS, Docker, TypeScript

- Programmed from scratch, and built a continuous integration pipeline to host it on my server at home. Read more at LoganWhitten.com
